From Across Town to the Far Reaches of the World, Yacht Owners Depend on Thomas Marine Systems, 24-7

John Thomas, Jr., president of South Florida based Thomas Marine Systems, received the frantic phone call from a valued yacht owner who was cruising the Greek Isles. “He said his air conditioning unit had stopped and for me to catch the next flight out,” Thomas recalled, “...and that nobody was allowed to work on it other than myself.”

Even though most of Thomas’s customers are serviced in South Florida where Thomas Marine Systems is located, he occasionally gets phone calls or emails from yacht owners who trust his expertise and depend on his 24-7 availability.

“While most of these emergencies take place in Florida and in the Caribbean, I do get phone calls from yacht owners in places as far away as Greece, and off I go on the earliest flight I can find,” adds Thomas.

The Thomas Family has been providing dependable, quality design, installation, retrofit and repair of air conditioning, refrigeration and ice making systems for the marine industry for over 50 years, serving primarily private yachts from 80 to 200 feet.

“My Dad, John Thomas, Sr., began the business in 1967 and I am proud to say his dedication to quality service has remained at the heart of our company,” says Thomas, who has over 25 years experience in the marine air conditioning and refrigeration fields.

Operating offices in Miami and Fort Lauderdale, the company is dedicated to superior service and marine parts supply, providing private yacht owners with quality installation, refits and service of air conditioners, water makers, refrigeration and ice machines.

The company operates a fleet of fully stocked service vehicles with 24-hour dockside service. In addition to specializing in private yachts, the company serves commercial and military vessels.

“With emphasis on both motorboat and sailing yachts, our commitment to customer service is first and foremost,” says Thomas. “We are proud of our reputation for reliability and know-how in the marine industry as reflected in our fully computerized operation and a staff of technicians who are factory trained and certified by the American Boat and Yacht Council (ABYC).”

Thomas Marine Systems represents AquaAir, Cruisair, Condaria, Eskimo Ice, Marine Air Systems, Webasto Marine Comfort, Technicold, S&K Watermakers, and Nautic Air. In addition to ABYC, the company is a member of Associated Builders and Contractors, the Marine Industries Association of South Florida and Air Conditioning Contractors of America.

For more about Thomas Marine Systems, contact John Thomas at 305/635-2062 or email service@thomasmarinesystems.com.
